

COMPSCI 3DM3

Introduction to Data Mining

Dr. Lingyang Chu

Department of Computing and Software

McMaster University

Instructors and Teaching Assistants

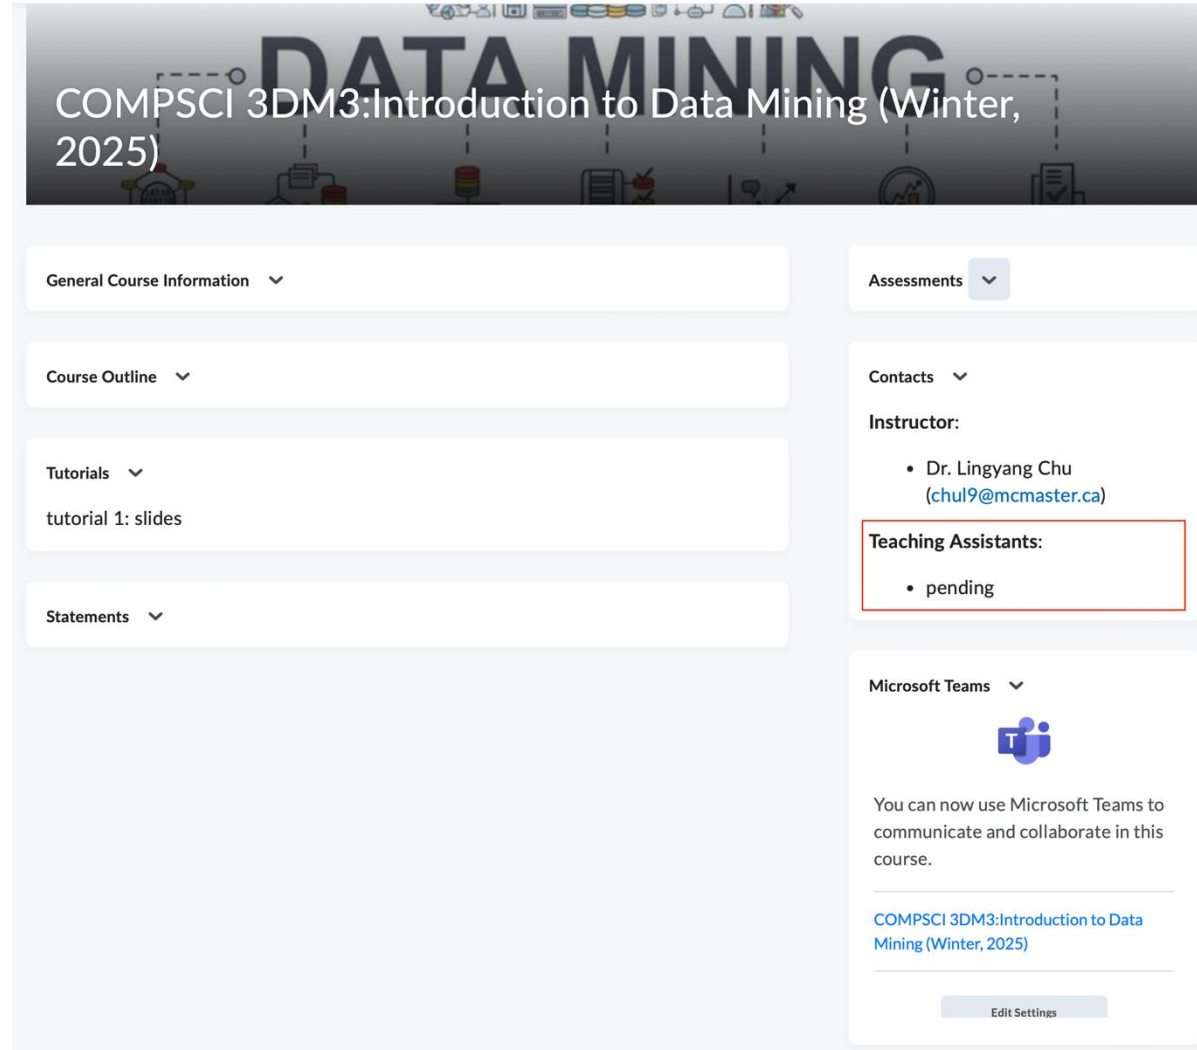

Information about TAs will be posted on Avenue soon.

Dr. Lingyang Chu (Instructor)

Email: chul9@mcmaster.ca

Office hour: see Avenue

A screenshot of the Avenue course page for COMPSCI 3DM3: Introduction to Data Mining (Winter, 2025). The page has a header with the course title and a background image of data mining icons. Below the header, there are several expandable sections: 'General Course Information', 'Assessments', 'Course Outline', 'Contacts', 'Tutorials', 'Instructor', 'Statements', 'Teaching Assistants', and 'Microsoft Teams'. The 'Teaching Assistants' section is highlighted with a red border and shows 'pending'. The 'Microsoft Teams' section includes a Teams icon and a message about using Teams for communication. At the bottom right, there is an 'Edit Settings' button.

Course Page & Class Schedule

- **Textbook:** Data Mining: Concepts and Techniques (3rd ed.), Jiawei Han, Micheline Kamber, and Jian Pei, Morgan Kaufmann, 2011.
(Link to PDF version available on Avenue course website)
- **Class Homepage:**
<https://avenue.cllmcmaster.ca/d2l/home/633275>
- **Lectures (in person):**
 - 10:30am - 11:20am on Monday, Wednesday, and Thursday.

Course Page & Class Schedule

- **Tutorials (in person):**

- 9:30am - 10:20am on Wednesday.
- 11:30am - 12:20pm on Thursday.
- 9:30am - 10:20am on Friday.

Course Overview: Topics

- What should you do when you are facing a huge amount of complicated data from real life applications?
- This course introduces the core techniques in big data analytics, namely knowledge discovery in databases (KDD), also known as data mining (DM). It focuses on the principles, fundamental algorithms, implementations, and applications.
 - Frequent pattern mining
 - Clustering analysis
 - Classification
 - Business intelligence

Course Work and Grading

Assignments, Quizzes, Projects and Exams

- Five written assignments (5% per assignment, 25% in total)

1. Mid-term exam (35%)

2. Final exam (40%)

3. Bonus marks (5%, **the final marks will not exceed 100%**)

(All work on assignments, programming projects, quizzes and exams should be done individually)

Routine of Assignments

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Week i-1	Assignment of week i-1 published.						If you need to MSAF the assignment of week i-1, 11:59pm of this day is the deadline to submit it.
Week i	Default assignment due on 11:59pm for the assignment of week i-1.						The deadline of extended due time for a valid formal MSAF request for the assignment of week i-1.
Week i+1	Publish grades for the assignment of week i-1.	TA tutorials discuss answers to assignments for week i-1.	TA tutorials discuss answers to assignments for week i-1.				

Course Policy (Also available on Avenue)

1. Some course policy is also included in the slides of the first lecture.
2. Please double check your assignments before submitting to Avenue. Faulty submissions due to any reason will be graded as zero and a re-submission will be considered as a late submission if it exceeds the due time.
3. The due time of assignments may vary according to the posted information on Avenue 2 Learn (A2L).
4. The grade of an assignment will be posted on A2L seven days after the due time. The answers will be explained in the tutorials of the following week after the grades are published.
5. If you MSAF an assignment, the due time of the assignment will be extended, however, the extended deadline will not pass the time when the grades of the assignment are posted on A2L.
6. An overdue submission is subject to a penalty of 20 marks per hour exceeding the submission deadline. The penalty is calculated by: $\text{penalty} = \text{floor}(\text{exceed hours}) * 20$ marks. For example, if you exceed 0.9 hours, the $\text{penalty} = \text{floor}(0.9) * 20 = 0$; if you exceed 2.1 hours, the $\text{penalty} = \text{floor}(2.1) * 20 = 40$.
7. If you do not agree on any marks of an assignment or an exam, you can appeal within seven days after the marks are published by sending the instructor an email. After seven days, the marks will be finalized, and no change is allowed.
- 8. The instructor reserves the right to conduct deferred examinations orally.**

BONUS MARKS! Yeah!

- How to get **bonus marks**?
 - Asking and answering questions in lectures. (1 mark per correctly answered question, **up to 5% of final bonus marks**)
 - Asked questions must be non-trivial to get bonus mark. The instructor reserves all the rights to evaluate if a question is trivial or non-trivial.
- How many bonus marks can you get?
 - Every student can get at most 5 bonus marks in total.
 - Each bonus mark weighs 1% of the final grade.
 - **The final grade will not exceed 100%.** This means, if your final grade becomes 105% after adding your bonus marks, you will still get 100% instead of 105%.

How to claim a bonus mark?

- A bonus mark can be claimed by sending Dr. Lingyang Chu an email in **exactly the following format** before 23:59 of the day when you gets the mark.

Title of the email: 3DM3 bonus mark 2025

Content of the email:

Full Name: John Smith

MacID: john123

StudentID: 1234567

Description: a brief description about how you get this bonus mark.

example

- The bonus mark will be voided if
 - The email format is not correct; **OR**
 - The claim email is not sent before 23:59 of the day when you gets the bonus mark.
- If you bonus mark is successfully claimed, you will receive a receipt email from Dr. Chu saying: “noted.”
 - Please keep the receipt emails until the end of this course. Otherwise, you may not get the bonus marks added in your final grade.

Teaching Format

- **MS Teams**

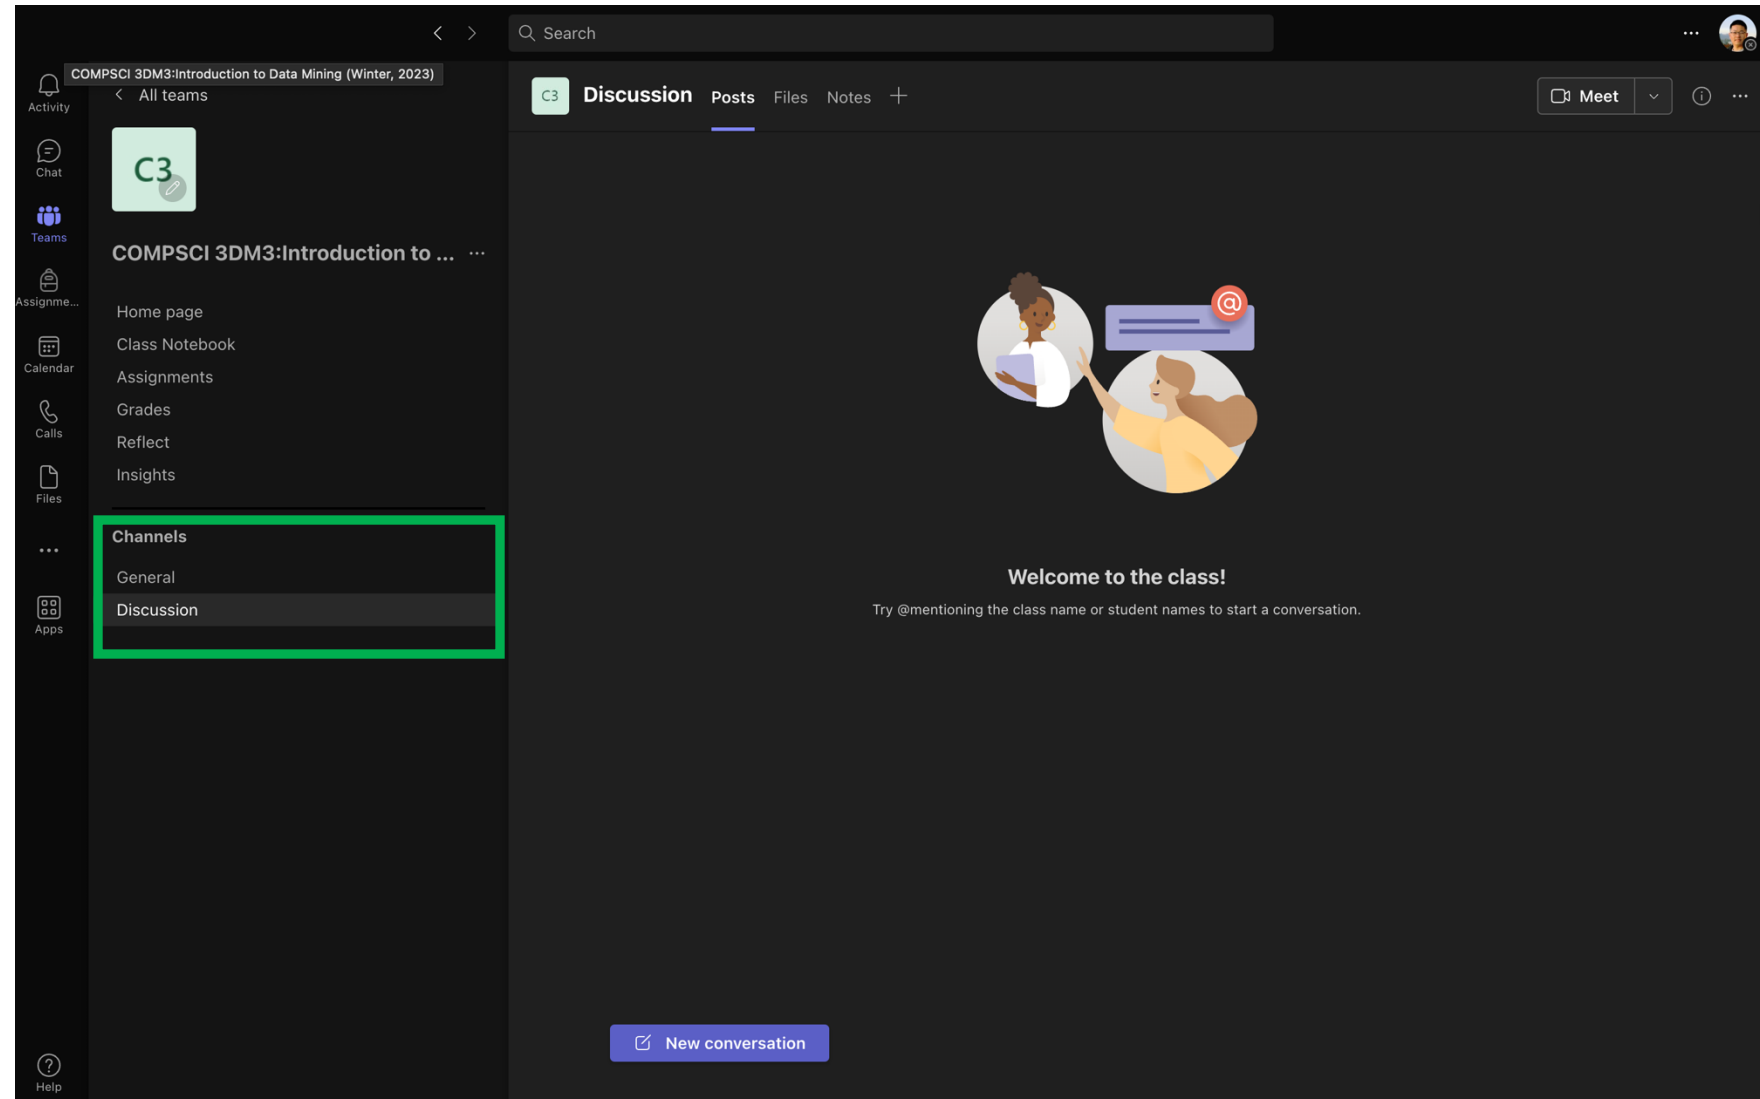

- Announcements and notifications.
- Online discussions about course related topics.
- No answers will be provided to assignments or exams until their grades are published.

- **Avenue**

- Assignments.
- Publish course related materials, such as slides and ebooks.
- All exams are in person.

Teaching Format: MSTeams

- **General Channel:**
 - Announcements, notifications.
 - Please frequently check this channel.
 - **Missing an announcement or notification in this channel will not be a valid reason for anything.**
- **Discussion Channel:**
 - Online discussions on course related topics only.

Teaching Format: Avenue

Raw access to unorganized course related materials. (**NOT recommended to use**)

This is where you can join the MS Team of the course.

Missing the posting of assignments and quizzes will not be a valid reason for delayed submission.

Academic Integrity

- **Confirmed infringement to academic integrity will be reported to the office in charge and will cause a direct failure of this course.**
- **It is your responsibility to understand what constitutes academic dishonesty.** (*Please refer to the Statement section on course website.*)
- Be aware of what is an Academic offense.
- Some typical examples:
 - Third party “tutorials” or “tutors”.
 - Online forums such as reddit and stack overflow.
 - Someone looking at your code or answers without your knowledge.
 - Hiring someone to do it for you.
 - ChatGPT or any other AI assistants.

Tips: Use Google to learn, do not use Google to copy and paste.
