Course Page & Class Schedule

- **Textbook:** David J. Eck, Introduction to Programming Using Java (Version 8.1.3, August, 2021), Hobart and William Smith Colleges (Link to PDF version available on course website)
- **Class Homepage:**
<https://avenue.dlmcmaster.ca/d2l/home/563938>
- **Lectures (In-person at BSB 147):**
 - 11:30AM – 11:20AM on Monday, Wednesday, and Thursday.
- All lectures will be in person and will not be recorded.

Course Page & Class Schedule

Tutorials (In-person, not recorded):

T01: 11:30AM - 12:20PM on Monday at T13 105
TA: Yimo Ning

T02: 12:30PM - 1:20PM on Tuesday at ABB 271
TA: Jimmy Yan

T03: 10:30AM - 11:20AM on Tuesday at ITB 139
TA: Fatemeh Norouziari

T04: 11:30AM - 12:20PM on Tuesday at JHE 326H
TA: Tammy Zeng

Note: detailed information of the tutorials is on Avenue in the section of "General Course Information".

Course Overview: Topics

- We are programming in Java.
 - We will use **Java** to introduce the concepts and principles of Object-Oriented Programming (OOP).
 - We will use **IntelliJ IDEA** as our major IDE. Free educational version is available online.
 - You will need a personal computer that can run Java and IntelliJ IDEA.
- Why Java not Python?
 - Both Java and Python are OOP programming languages, they both demonstrate the key principles of OOP.
 - There are many OOP languages. **Question: can you give me another example of OOP?**
 - The stricter syntax of Java better demonstrates the principles of OOP, which is better for beginners.
- Topics covered by this course include:
 - Classes, objects, interfaces, references, methods and fields.
 - Types of inheritance, overriding, polymorphism, overloading, exception handling, generics, recursion, design by contract, file I/O and use of standard APIs.
 - The implementation of some basic data structures and algorithms.

Course Overview: Weekly Routine

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Week i-1	Default day to post assignment of week i-1						
Week i	Default assignment due on 11:59pm of this day for assignments of week i-1.	One lecture One tutorial		One lecture Two tutorials		One lecture One Tutorial	Submission deadline of MSAF relief assignment i week i-1 is 11:59PM of i day
Week i+1	Grades of the assignment of week i-1 will be published in the weekend.	TA tutorials discuss answers to assignments for week i-1.		TA tutorials discuss answers to assignments for week i-1.		TA tutorials discuss answers to assignments for week i-1.	

There are lectures and tutorials every week

Assignment schedule. There is NO 2 week cycle. Routines may overlap.

- Not all weeks have assignments. The due time of assignments may vary according to the posted information on Avenue 2 Learn.
- The formal MSAF application should be submitted **BEFORE** the due time of the assignment to MSAF. Otherwise, the MSAF application will be considered invalid, thus no relief will be provided.
- Overdue assignments without MSAF relief will not be graded and it will receive 0 mark.
- Assignments with MSAF will be graded if submitted before the MSAF relieved deadline. Otherwise, it will receive 0 mark.

Course Work and Grading

Assignments, Quizzes, Projects and Exams

- Ten written assignments (about 5% each, 50% in total)
- Mid-term exam (20%)
- Final exam (30%)
- The above marks sum up to 100%
- *Bonus (Additional 10%, but the final marks will not exceed 100%.)*
- Note: All works on assignments, programming projects, quizzes and exams is to be done individually.*

Need help and/or discussions?

- Avenue (<https://avenue.cilmcmaster.ca/d2l/home/563938>)

Check your homework/exam scores:

- Avenue (<https://avenue.cilmcmaster.ca/d2l/home/563938>)

How to Get the Bonus 10 Marks?

- By answering questions correctly in the following two Ways.
- **First**, I will randomly ask questions in lectures. **The first student who answers a question correctly will get 1 bonus mark.**
- **Second**, there will be students posting questions in MS Teams. **The first student who answers a meaningful posted question correctly will get 1 bonus mark.**
 - Dr. Chu preserves the rights to determine whether a posted question is meaningful or not.
 - For example: a question that is very similar to a previously answered questions will not be considered meaningful.

*The Bonus 10 marks is in addition to the 100 marks of the course, but the final marks will not exceed 100.
For example:*

1. *If you get 85 marks in the course and get 10 bonus marks, then the final marks will be 95.*
2. *If you get 98 marks in the course and get 10 bonus marks, then the final marks will be 100.*

How to claim a bonus mark?

- A bonus mark can be claimed by sending Dr. Lingyang Chu an email in **exact! the following format before 23:59 of the day when you gets the mark.**

Title of the email: 2023 bonus mark 2023

Content of the email:

Full Name: John Smith
MacID: john123
StudentID: 1234567
Description: a brief description about how you get this bonus mark.

example

From: daniel03.smiths@icloud.com
To: 2023 bonus mark 2023
Re: Lingyang Chu

Full Name: John Smith
MacID: john123
StudentID: 1234567
Description: a brief description about how you get this bonus mark.

- **The bonus mark will be voided if**
 - The email format is not correct; **OR**
 - The claim email is not sent before 23:59 of the day when you gets the bonus mark.
- If you bonus mark is successfully claimed, you will receive a receipt email from Dr. Chu saying: "noted."
 - Please keep the receipt emails until the end of the term. Otherwise, you may not get the bonus mark added in your final grade.

Teaching Format

• In Person Teaching

- Lectures
- Tutorials
- Office hours (ITB 213, hours → see Avenue)

• Avenue

- Assignments
- Quizzes and exams
- Publish course related materials

• MS Teams

- Announcements and notifications
- Online discussions and Q&A

• IntelliJ IDEA

- Major Java programming integrated development environment (IDE)
- Download link available on course website

21

Teaching Format: Avenue

Raw access to unorganized course related materials. (NOT recommended to use) → Do NOT use, not maintained

The screenshot shows the Avenue course page for SFWRENG 20P3: Object-Oriented Programming (Fall, 2023). The page has a header with navigation links: [Course Overview](#), [Introduction](#), [Resources](#), and [Course Dates](#). The main content area is divided into two columns. The left column contains links for [General Course Information](#), [Course Syllabus](#), [Assignments](#), and [Policies](#). The right column contains links for [Assignments](#), [Quizzes](#), and [Microsoft Teams](#). Annotations with arrows point to these links and provide additional context.

General information of the course such as time schedule, contact information etc.

Videos, slides, teaching progress will all be here. (Recommend to check frequently.)

Regulations and policies. (Recommend to read carefully.)

Assignments, quizzes and their dates will be posted here. (Recommend to check frequently.)

Link to the MS team of this course. You can join the team by yourself using the link here.

Missing the posting of assignments and quizzes will not be a valid reason for delayed submission.

22

Teaching Format: MS Teams

Usage of Channels

- **General:** important announcements will be posted here. Please check here frequently. **Missing the posting of an announcement will not be a valid excuse for anything.**
- **Discussion:** this is where you can ask questions to get answers from me, the TAs, and your classmates. **This is where you can get your bonus marks outside of classroom.**
- **Tutorial:** this is a temporary channel which is only used to deliver online tutorial under special conditions if there is any.

Both asker and recipient
of neutral MS Teams question
get +1 bonus mark

11

Academic Integrity

- Confirmed infringement to academic integrity will be reported to the office in charge and will cause a direct failure of this course.
- **We will use professional software to detect code similarities.**
 - All the assignments detected as similar by the software will be equally considered as potential plagiarism. There is no difference between which is original, and which is not.
 - DO NOT use ChatGPT like software. ChatGPT produced codes can be easily detected.
- This is a coding course, and you are getting a software engineering degree.
 - If one needs to cheat to succeed in this course, perhaps it is time to think whether it is a wise idea to proceed with the program.

12

Academic Integrity

- It is your responsibility to understand what constitutes academic dishonesty. (Please refer to the Statement section on course website.)
- Be aware of what is an Academic offense.
- Some typical examples:
 - Third party "tutorials" or "tutors", or virtual tutors like ChatGPT
 - Online forums such as reddit and stack overflow.
 - Someone looking at your code or answers without your knowledge.
 - Hiring someone to do it for you.

Use Google to learn, do not use Google to copy and paste.

Forbidden → using resources to do your work
Permitted → Using resources as an inspiration

34

Tips to Success (in this course, and many others)

- The best way to learn coding is coding.
 - Practice coding as much as you can.
 - Do some interesting coding projects:
 - Use java to write a mini game, etc. Group up a team with your best friends!
- Classroom is where you learn the fundamentals, Internet is where you learn it all.
 - For example, use Github and Leetcode more to sharpen your coding skills.
 - Be creative in learning.
- Ask more questions, ask the right questions.

- Ask more questions, ask the right questions.
 - Asking a right question is 50% success to getting a right answer.
 - The more questions you ask, the more you learn.
 - Frequently asking right questions is an excellent sign of active thinking and learning.
